To ensure this transparency, we provide calorie information both on our website and through our app. We publish detailed food profiles for more than 1000 combinations of regular pizzas and those made with our Delight Cheese. We have also recently created the ingredients of the Bible; A reference source for each ingredient used in our products, allowing us to explain to customers why individual ingredients are present. We are proud to say that we continue to not use artificial colors or flavors in any of our pizzas or by-products, and removed trans fats a few years ago. We also offer a gluten-free pizza base that is becoming increasingly popular with our customers. In accordance with our commitment to displaying allergens and nutritional information, you can link here to view the full breakdown of nutrition and analysis, as well as the full information about allergens. We always advise customers with allergies to check this information when ordering from Domino's as it is regularly updated. If the customer has additional questions, we encourage them to contact the local store. Nuts are not used as an ingredient in any of our pizzas or side dishes. However, we can't say that our food is nuts-free. While we require that all suppliers have allergen controls in place, we cannot be absolutely sure there is no risk of cross-contamination. Packaged branded products that may contain nuts, such as ice cream, are clearly labeled. Our stores are also busy working environment, which means that there is always some risk of cross-contamination. The calorie and nutrition information provided for our products is only a guide, as all of our handmade pizzas are custom-made and nutritional values can vary. You can also brand branded ice cream and drinks; Please refer to the packaging for more information.
